

smartControl

Remote control your smartphones from your PC

Free Trial available

With **smartControl** working with your smartphone becomes faster and more efficient. Just connect your device to a PC and start remote controlling it.

Use **smartControl** for presentation and demonstration to display your smartphone's screen on a PC or video projector in realtime.

Architecture

Possible fields of application:

- demonstration, presentation
- comfortable input of texts (e.g. SMS, MMS)
- generation of screenshots for documentation
- generation of videos showing the handling of the device
- simplification of application testing

Free Trial available:

You can evaluate **smartControl** for free.

The Free Trial supports the full functionality of **smartControl**. The session length is limited to a maximum of 5 minutes.

PC Viewer Application

Download your **smartControl** Trial at:

www.smartphone-solutions.com → Download → smartControl

To remove Trial limitations a separate license is required for each device using **smartControl**. To purchase licenses contact mail@smartphone-solutions.com.
