## Phonebook synchronization for smartphones

With **smartPhonebook** you have access to your corporate contacts on your mobile devices. By synchronizing these data to your smartphone it automatically has always the most current contact details available.

### Features of **smartPhonebook**:

- stand-alone client
  - data do not get "mixed up" with the system phonebook
  - similar to the phone's system integrated phonebook
- contacts
  - list
  - search
  - call
  - send messages (SMS, MMS, E-Mail)
- view contact details
- contacts can be associated to different groups
- contacts are available offline on the device
- contacts can not be edited (read-only)
- on incoming calls of a person being listed in **smartPhonebook**, a bubble with the contact data is displayed automatically
- fields of application
  - mobile application (synchronization over-the-air via **smartMan**)
  - local application (synchronization via local wizard on a desktop PC)

**smartPhonebook** is available for all S60 3rd Edition smartphones.
